Sustainability

Since our establishment in 1999, sustainability has been an important principle at Guldsmeden Hotels. It is an integral part of our decision-making and operational processes.

We focus on minimizing our environmental impact and responsibly managing the resources our hotels rely on.

In recognition of developments in sustainability, we have partnered with Klappir and FoodOp, two platforms that enable comprehensive data collection across our operations. This allows us to monitor key metrics, from energy consumption to waste management, both internally and externally. It helps us make our hotels even greener.

Our commitment has given us certifications such as Green Globe, Green Key, and The Golden Organic Cuisine Label. These acknowledgments stem from Guldsmeden Hotels' strict adherence to benchmarks in water use, energy saving, waste reduction, and sustainable practices. However, we understand that the path to a more conscious future is an ongoing process, where there is always more to discover and achieve for the planet's well-being.

Guldsmeden Hotels is dedicated to providing guests with an exceptional experience while striving to minimize our environmental footprint.
